Threading technique for Blending Filament, Japan #1 and Cord: Cut about an 20-inch length of thread and fold about 2 inches from one end to create a loop. Insert the loop through the eye of the needle and pull the loop over the point of the needle to "lock" in place.

Threading technique for Braids, Ribbons and other Kreinik metallics:
Cut a small strip of paper and fold in half. Place the fold through the eye of the needle and open the two ends to insert the thread in between. Gently pull the paper through so the thread is brought along.
